AMISHA CHOUDHARY

Cloud & DevOps Engineer | Azure | Kubernetes | CI/CD | AI Automation
Bangalore, Karnataka| P: +91 9631121762 || amishachoudhary2021@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer at Tata Consultancy Services with experience in Azure infrastructure, Kubernetes-based deployments, CI/CD automation and Infrastructure as Code. Hands-on experience with AKS, Docker, Jenkins, Helm, Terraform, monitoring and distributed application infrastructure. Experienced in developing infrastructure management solutions and AI-assisted engineering workflows using Claude Code, AI agents and MCP integrations. Strong software engineering foundation across Java, Python, Spring Boot and full-stack development.

WORK EXPERIENCE

DevOps & Cloud Engineer | Tata Consultancy Services (TCS) Feb'26 – Present

Gaming Domain Project | Microsoft Azure

- Manage and maintain Azure cloud infrastructure, supporting application deployments, environment provisioning and platform operations.
- Develop and maintain CI/CD pipelines using Jenkins and GitHub Actions, automating build, containerization and deployment workflows.
- Deploy containerized microservices on Azure Kubernetes Service (AKS) using Docker and Helm.
- Developed a full-stack Infrastructure Management Portal with Admin and User panels, automating Azure resource and Resource Group lifecycle operations, including provisioning, monitoring, maintenance and deletion.
- Implement infrastructure automation and cloud resource management using Infrastructure as Code(IaC) practices and Terraform.
- Configured Prometheus and Grafana dashboards for monitoring infrastructure, applications and Kubernetes workloads, improving system visibility and troubleshooting.
- Work with distributed infrastructure involving PostgreSQL, Kafka, Redis and MongoDB, supporting application data and messaging workflows.
- Developed AI-assisted DevOps workflows using Claude Code, custom skills, plugins, hooks and MCP integrations to streamline repetitive engineering and debugging tasks.

Initial Learning Program (ILP) Trainee | Tata Consultancy Services Nov'26 – Feb'26

- Completed intensive technical training in Java, Spring Boot, Angular, SQL, JDBC, Unix/Linux, OOP and software engineering fundamentals.
- Developed a Hotel Management System using Angular and Spring Boot, implementing CRUD operations, booking workflows and RESTful APIs.
- Gained practical experience in backend development, database connectivity and frontend-backend integration.

Machine Learning Intern | Prasunet Jun'24 – Jul'24

- Built supervised ML models achieving 87%+ accuracy; improved training speed by 40% via optimised preprocessing.
- Integrated models into a Flask API, reducing manual workflow time by 60% for real-time predictions.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Cloud & Infrastructure:** Microsoft Azure, AKS, ACR, Azure VMs, Azure Front Door, Key Vault, AWS (EC2, S3, Lambda)
- **DevOps & CI/CD:** Jenkins, GitHub Actions, Docker, Kubernetes, Helm, Terraform, Infrastructure as Code, Git
- **Monitoring & Observability:** Prometheus, Grafana, Log Analysis, Kubernetes Monitoring
- **Backend & APIs:** Spring Boot, FastAPI, Node.js, Three.js, REST APIs, JDBC
- **Tools & Others:** Git, Github, REST APIs, Linux, TensorFlow, PyTorch, Machine Learning
- **Databases & Messaging:** PostgreSQL, MongoDB, MySQL, Redis, Apache Kafka
- **Frontend:** React.js, Next.js, Angular, HTML, CSS, Tailwind CSS, Figma
- **AI & Automation:** Claude Code, GitHub Copilot, ChatGPT, Gemini, AI Agents, MCP Integrations, Claude Skills & Plugins, Prompt Engineering
- **Operating Systems:** Linux, Unix, Windows

EDUCATION

Vellore Institute of Technology (VIT), Vellore Vellore, Tamil Nadu
Bachelor of Technology Jul'23 – Jul'27
Computer Science and Engineering with specialisation in Bioinformatics 8.9/10.0
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Software Engineering, Artificial Intelligence and Data Analysis.

UNIVERSITY PROJECTS

DentAI - Automated dental disease detection WebApp(Link) Feb'24 – Apr'24
Python, TensorFlow, OpenCV, CNN, Keras, Matplotlib, PIL, StreamLit cloud
- Engineered an Enhanced CNN model trained on a custom dental dataset, achieving 80% accuracy in detecting six oral conditions (e.g., caries, hypodentia, gingivitis).
- Developed and deployed an interactive diagnostic web app using Streamlit Cloud, enabling real-time cavity/gum health predictions with Grad-CAM visualisations.

Agroscan - Potato disease detection WebApp (Link**)** Aug'24 – Oct'24
Python, TensorFlow, OpenCV, CNN, Keras, Matplotlib, PIL, StreamLit cloud
- Achieved 95% image classification accuracy with CNN-based model for plant disease detection.
- Reduced false positives by 20% using custom augmentation and filtering techniques.
- Deployed on Streamlit Cloud with real-time diagnostics used by 100+ users.

TASTY FOODS - A food ordering full stack WebApp(Link**)** Dec'24 – Jan'25
Next.js 14(React.js, tailwind, Mongodb), bcrypt, Node.js, stripe API
- Developed responsive web app with secure authentication (bcrypt, NextAuth), payment gateway (Stripe), and image handling via MongoDB.
- Designed REST APIs supporting 300+ simulated transactions; implemented secure role-based access.

CERTIFICATION

- AWS Certified Cloud Practitioner
- Google Cloud Digital Leader
- Machine Learning A–Z (Udemy)
- Claude Certified Developer – Foundations
- GenAI E2 Proficiency

ACHEIVEMENTS

- 2nd Runner-Up, YourStory Hackathon; GSSoC Adventurer Badge for open-source contributions.
- Java (Gold Badge) and 3-Star DSA on HackerRank; Silver Badge on CodeChef; solved 250+ LeetCode problems.
- Design Head, RoboVITics – led robotics projects and workshops with good success rate.
- Core Member, Creativity Club – organized events, boosting participant engagement.
- Publicity and Marketing Coordinator, Riviera'23 (College fest).
